

POWER COST ADJUSTMENT SAVING YOU MONEY ON YOUR ELECTRICAL BILL

City Council voted on Monday night (March 27, 2023) following a presentation by the Finance Director to lift the 3 cent kWh power adjustment. The cost to purchase power fell due to our mild winter and other factors, which means we now have a savings to pass back on to our customers.

The power cost adjustment will reflect on your bills issued beginning with bill dates on and after April 1st. (Your "bill date" is found in the upper left hand corner under Account information).

This rate is good through June 30, 2023

To gain a better understanding, we have made the short presentation available by [**CLICKING HERE.**](#)

The presentation contains valuable information in understanding the rate comparison, PPA (purchase power adjustment), and the impact of our electric utility.
