

# CROSS CONNECTION CONTROL PROGRAM - REVISIONS

JUNE 1, 2026

In 2021, the State of Delaware required all Delaware public water systems to create and maintain a Cross Connection Control Program (Program). The City of Dover has created and implemented this Program, but has now made some revisions, specifically for the properties deemed Low Hazard.

To review our latest Program, please visit our City of Dover Cross Connection Control Webpage: <https://www.cityofdover.com/CrossConnectionControlProgram>.

For more information on the State of Delaware regulation please visit: <https://regulations.delaware.gov/AdminCode/title16/4462> (Section 21.0)
